

Who is sitting in his seat, a seat broad and broken?

The traveling wizard sat under the tree, opened his knapsack, and reviewing the complete set of his brightly colored graphs, thought "what kind of problem is this?"

Bring a bicycle pump. Baffled? Follow the symbols of magic

Bring a periodic table of the elements

Mon says it's okay to run with scissors!

Heeeeeere's Johnny! Concentrate and ask again

The circus went to Wuthering Heights

Sully, you're the man!

In parallel, know resistance

D.G. Regina, how much can you raise?

Abracadabra! They are not who they first appeared to be!

This kind of magic's so hard to believe

What's it going to cost? Measure twice, cut once!

Hunters should avoid straying to the left or right, and unite! The solution is often in the middle

Bring it!

Be wary of real Jackasses, but don't let your imagination make you paranoid.

Pound sand!!! at least 10, one pound at a time, and bring it along

Balance comes not from a psychological advantage but a mechanical one.

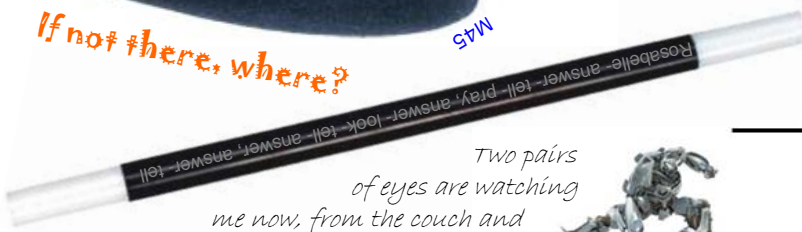

Weigh the options. The difference, you will discover, is significant!

Are you sure it isn't time for a "colourful metaphor"?

If not there, where?

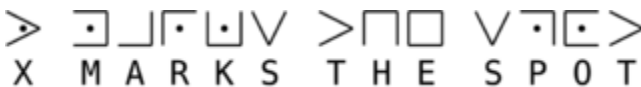

Enlightened hunters listen closely, bring earphones (3.5mm) and a battery (AAA)

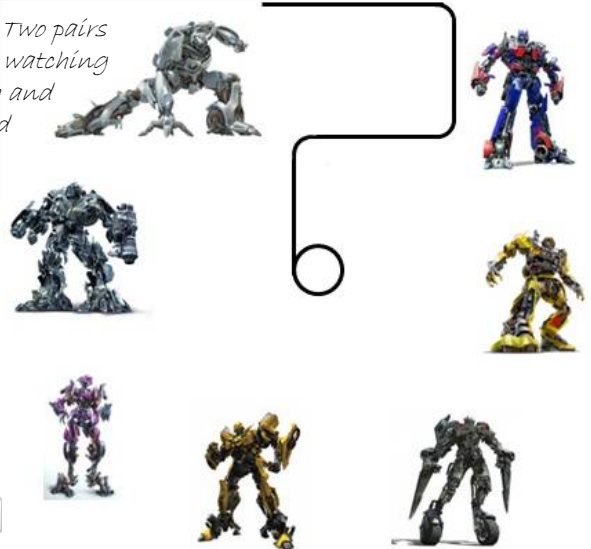

Two pairs of eyes are watching me now, from the couch and the ledge by the window. Faerieland shines in those eyes. And I must leave you, for it's the witching hour and a full moon is rising. . . .

Double bubble, toil and trouble. Fireburn and caldrion bubble.

Wichita witch, Denver diviner, Milwaukee magician, Waukesha wizard, Palm Beach palmist, San Jose shaman, Congo conjurer, South Hampton soothsayer, Sacramento sorcerer

What on earth is at 44.5°S 137.5°E ? 19.5°N 146.5°W ? What isn't?

Turn the Corner
